WASHBURN TECH PROGRAMS

GO Topeka recognizes community members may want to start a new career, change careers or update their current skills. We offer support through a variety of initiatives and programs partnered with Washburn Tech to serve the Topeka and Shawnee County community.

The Joint Economic Development Organization/GO Topeka Scholarship provides eligible Washburn Tech students enrolled in high demand career programs with scholarships ranging from \$250-\$500 per semester. More information about the scholarship opportunity may be found [here](#).

GO Topeka is also pleased to provide marketing and recruitment support to the partnership between Washburn Tech and BNSF to offer NARS-certified curriculum (National Academy of Railroad Sciences) in their Locomotive Diesel Technician [program](#).

In addition, Washburn Tech, in partnership with GO Topeka and in cooperation with area food manufacturers, offers the pilot Manufacturing Technology or [M-Tech](#) training initiative. The program provides intensive technology training to workers and links them to good jobs in the food manufacturing field. Graduates are prepared for entry-level production positions and are prepared to earn the Certified Production Technician national industry credential.
