

March is **WOMEN'S HISTORY MONTH**

Women's Forum

Featuring Wendy Doyle
The State of Women in Kansas Report
Panel Discussion
Athena Women's Leadership

Though strides have been made toward achieving equitable representation in the workforce, women's participation still lags in several key indicators. Across the U.S., female labor-force participation is about 10 percentage points lower than that of their male counterparts. In Kansas, women's median earnings are almost 10% lower than the U.S. median. And compared to the national average, Kansas has significantly fewer women in management roles.
